IFIP Statement on Information Security Assessment and Certification:

1. In keeping with the global move to electronic commerce, the information security status of IT systems and the information security management of such systems should be assessed against specified standards related to information security management.
2. Those performing such assessments should themselves be accredited according to specified certification standards, and
3. Members of IFIP should be instrumental to ensure that such standards, for systems and individuals, be harmonized on an international level.
4. TC11 of IFIP is organizing a workshop in 1999 to consolidate on the aspects above. For more information contact Prof Jan Eloff at elo@rkw.rau.ac.za. This email address is being protected from spam bots, you need Javascript enabled to view it.
