| K. Bauknecht | Switzerland | 1995-1998 |

# INTRODUCTION

This publication is an edited subset of a comprehensive database which is regularly updated and is accessible through international networks. In particular the “electronic Bulletin” contains detailed statements of aims and scope for every Working Group.

A wide range of information is available electronically from the IFIP secretariat including the IFIP Newsletter, minutes of our General Assembly and Council meetings, IFIP documents and other valuable information on IFIP and its activities.

There are also links to pages of information about our Members and Technical Committees.

Access may be obtained as follows:

**http://www.ifip.or.at/**

The Information Bulletin is printed free of charge by Kluwer Academic Publishers.

# IFIP IN PERSPECTIVE

## Origins

IFIP traces its roots to the very first major international conference on computers and computing which was held in Paris in 1959 under the auspices of UNESCO. Representatives of the main computer societies active in computing got together at that meeting to explore ways of building on the achievements of the conference. As a result thirteen national computer societies agreed to found in 1960 an international federation and named it IFIP - the International Federation for Information Processing.

IFIP's principal aims were and are to foster international cooperation, to stimulate research, development and applications and to encourage education and the dissemination and exchange of information on all aspects of computing and communication.

IFIP's creation was well timed. In the 1960s there began a veritable explosion in the growth of the computer industry and in the application of its products. Within the life-span of IFIP information technology (as it is widely known today) has become a potent instrument affecting people in everything from their education and work to their leisure and in their homes. It is a powerful tool in science and engineering, in commerce and industry, in education and administration and in entertainment.

## Membership

Today IFIP has 44 organizations as Full Members, 4 Corresponding Members and 11 Affiliate Members, representing countries from all regions of the world.

## Organization

A General Assembly of all its Members and TC Chairs takes place annually and has overall responsibility for all of IFIP's strategy, finance and activities. It elects a President, four Vice-Presidents, a Treasurer, a Secretary and eight Trustees who together form the IFIP Council.

## Congresses and Major Conferences

IFIP's flagship event is its World Computer Congress, currently held biannually. The 16th IFIP World Computer Congress was held from 21 to 25 August 2000 in Beijing, China. Montreal, Canada will be the venue of the 17th IFIP World Computer Congress from 25 to 30 August 2002 (http://www.wcc2002.org). Jerusalem was chosen as the lieu of the 18$^{th}$ IFIP World Computer Congress in the year 2004.

The nature of these Congresses has changed substantially over the years.They consist of a number of independent conferences and tracks, each dealing with a major specialised subject. These run in parallel so that some more general keynote addresses can be attended by all participants who can also share in social and other acitivities.

In addition there are major international conferences organised by our Technical Committees. These include events dealing with Production Engineering, Security, Computers in Education and Human Computer Interaction.

## Technical Activities

At the heart of IFIP lie its Technical Committees that, between them, count on the active participation of some two thousand people world-wide. There are twelve such Committees. Each Technical

committee is, in effect, a management team responsible for a given field of activity and for the work of from three to nine Working Groups, a total of 80. These Groups work in a variety of ways to share experience and to develop their specialized knowledge. These include open conferences, smaller working conferences, seminars and tutorials, circulated papers and, increasingly, as befits our subject, electronic conferencing and e-mail.

## Publications

Many IFIP events are linked to publications and there are annually some 30 to 40 IFIP books. Our principal publisher is

Yana LAMBERT
IFIP Editor
Kluwer Academic Publishers
101 Philip Drive
Norwell, MA 02061, U.S.A.
Tel: +1 781 681-0604
Fax: +1 781 871-7507
E-mail: yana.lambert@wkap.com

## IFIP Newsletter

A vital element of IFIP's communication with its Members and with all who participate in our work is the IFIP Newsletter. This is published quarterly in both hard copy and electronic form.

Newsletter editor:

Dr. J. L. ROSENFELD
15 Eldridge Ave.
OSSINING, NY 10562-4403, U.S.A.
Tel. +1 914 941 5222
e-mail: j.l.rosenfeld@alum.mit.edu

Newsletter online:

http://www.ifip.or.at/newsl.html

## Relationships

IFIP enjoys friendly cooperation with a number of international organisations. First among these is UNESCO with which IFIP maintains a formal consultative relationship. UNESCO has commissioned from IFIP several projects and supports the participation of people from developing countries in IFIP events. IFIP is a Scientific Associate of ICSU (International Council of Scientific Unions).

There are four international federations with which IFIP collaborates. These are IFAC (International Federation of Automatic Control), near neighbours of ours in Laxenburg, IMACS (International Association for Mathematics and Computers in Simulation), IFORS (International Federation of Operational Research Societies) and IMEKO (International Measurement Confederation).

## IFIP Secretariat

The administrative hub of IFIP is our secretariat at Laxenburg, near Vienna. The Executive Director is Plamen Nedkov who with the assistance of Dorothy Hayden and Brigitte Brauneis is responsible for the wide range of tasks vital to the operation of such a far-flung international body. Good communication and information are essential and our secretariat provides a comprehensive service using up-to-date technology.

# IFIP's Mission Statement

IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of Information Technology for the benefit of all people.

**Principal Elements**

1. To stimulate, encourage and participate in research, development and application of Information Technology (IT) and to foster international co-operation in these activities.
2. To provide a meeting place where national IT Societies can discuss and plan courses of action on issues in our field which are of international significance and thereby to forge increasingly strong links between them and with IFIP.
3. To promote international co-operation directly and through national IT Societies in a free environment between individuals, national and international governmental bodies and kindred scientific and professional organizations.
4. To pay special attention to the needs of developing countries and to assist them in appropriate ways to secure the optimum benefit from the application of IT.
5. To promote professionalism, incorporating high standards of ethics and conduct, among all IT practitioners.
6. To provide a forum for assessing the social consequences of IT applications; to campaign for the safe and beneficial development and use of IT and the protection of people from abuse through its improper application.
7. To foster and facilitate co-operation between academics, the IT industry and governmental bodies and to seek to represent the interest of users.
8. To provide a vehicle for work on the international aspects of IT development and application including the necessary preparatory work for the generation of international standards.
9. To contribute to the formulation of the education and training needed by IT practitioners, users and the public at large.

# 17th WORLD COMPUTER CONGRESS

**"Information Technology for our Times:**
**Ideas, Research, and Application in an Inclusive World"**

**Montreal, Canada, 25 - 30 August 2002**

August 2002, when Montreal hosts the 17th World Computer Congress (WCC 2002), will present a rare occasion to learn from the world's most renowned Information Technology (IT) authorities. These experts will SHARE the results of leading-edge research and commercial successes, EXPLORE benefits for society, and INSPIRE industry leaders to seize new opportunities.

Conference highlights include keynote speakers who are among the best IT minds in the world, as well as presentations by members of the IFIP Working Groups and Technical Committees, who will share the results of their most recent research.

Consequently, representatives from industry will be given a highly valuable occasion to explore new business opportunities. This same stimulation of the imagination will be offered to other groups interested in this exciting sphere of activity, such as younger workers in IT and participants from developing countries.

## IFIP TECHNICAL COMMITTEES

There are Aims shared by all or most Committees which are not subject specific. They are as follows:

1. To establish and maintain liaison with national and international organisations with allied interests and to foster cooperative action, collaborative research and information exchange.
2. To identify subjects and priorities for research, to stimulate theoretical work on fundamental issues and to foster fundamental research which will underpin future development.
3. To provide a forum for professionals with a view to promoting the study, collection, exchange and dissemination of ideas, information and research findings and thereby to promote the state of the art.
4. To seek and use the most effective ways of disseminating information about our work including the organisation of conferences, workshops and symposia and the timely production of relevant publications.
5. To have special regard for the needs of developing countries and to seek practicable ways of working with them.
6. To encourage communication and to promote interaction between users, practitioners and researchers.
7. To foster interdisciplinary work and, in particular, to collaborate with other Technical Committees and Working Groups.

# TECHNICAL COMMITTEES AND WORKING GROUPS

## TC 1 (FOUNDATIONS OF COMPUTER SCIENCE)

est. 1989 as SG14 / approved in 9/96 as TC 1

### AIMS

- to support the development of theoretical computer science as a fundamental science that has similar scientific goals in understanding the information processing world as physics has in understanding the energy processing world and similar goals in developing methodology for science and technology as mathematics does;
- to support the development and exploration of fundamental concepts, models, theories, systems, and other basic tools and the understanding of laws, limits, and possibilities of information processing as well as to de-velop bridges with other sciences and their applications.

### SCOPE

To encourage, organise, support, and unify the development of the following areas:

- frontiers, laws, and limits of information processing;
- fundamental formal systems;
- efficiency and complexity of information processing;
- formal systems to specify, design, verify, analyse, and manipulate
- complex information processing systems;
- theoretical foundations of various other parts of computer science and its main application areas;
- scientific paradigms of informatics and their relations to other disciplines;
- information processing fundamental concepts, models and theories to support the development of other sciences. With the goal to develop foundations and to make use of them.

## TC 2 (SOFTWARE: THEORY AND PRACTICE)

est. 1962, revised 1982, 1990

**AIMS**

To obtain a deeper understanding of programming concepts in order to improve the quality of software by studying all aspects of the software development process, both theoretical and practical.

**SCOPE**

The scope of the committee encompasses all aspects of the software development process including the specification, design, implementation and validation of software systems. Areas of present activity are:

- formal models of software concepts
- programming languages and techniques
- models for information storage and processing
- program support environments
- user interfaces to software systems
- software quality

**TC 3 (EDUCATION)**

est. 1963, revised 1992, 1995, 1998

**AIMS**

- To provide an international forum for educators to discuss research and practice in:
  - teaching informatics
  - educational uses of communication and information technologies (ICT)
- To establish models for informatics curricula, training programs, and teaching methodologies.
- To consider the relationship of informatics in other curriculum areas.
- To promote the ongoing education of ICT professionals and those in the workforce whose employment involves the use of information and communication technologies.
- To examine the impact of information and communication technologies on the whole educational environment:
  - teaching and learning
  - administration and management of the educational enterprise
  - local, national and regional policy-making and collaboration.

**TC 5 (COMPUTER APPLICATIONS IN TECHNOLOGY)** est. 1970

**AIMS**
To promote and coordinate the exchange of information on computer applications in technology.
**SCOPE**
includes all aspects of computer applications in technology, i.e., in the research, design, manufacture, operation and control of products and physical systems; it also includes the investigation of related programming methods. Some non-exclusive examples are:

- control computers;
- computers in manufacturing including numerical control and machine tools;
- computer applications in design, including interactive graphics;
- simulation, and analog and hybrid computer applications;
- computers for traffic control;
- problem-oriented languages;
- interactive graphics.

**TC 6 (COMMUNICATION SYSTEMS)**

est. 1971, revised 1987 and 1991

**AIMS**

- to promote the international exchange of information related to communication systems;
- to bridge gaps existing between users, telecommunication operators, service providers and computer and equipment manufacturers;
- to establish working contacts with international bodies concerned with data communication, such as ITU, ETSI, ISO, IEEE, IETF, ITC and ATM Forum.

**SCOPE**

The Scope of its work includes all aspects of communication systems, such as research on and design, manufacture and operation of products, systems, concepts and architectures related to information exchange. Some examples of areas of special interest are:

- Work fostering the development of standards;
- Formal protocol specification and verification techniques;
- National and international communication networks;
- Local and wide area communication networks;
- Integrated services digital networks;
- Network management;
- Distributed computing and information interchange between databases within a network of computers;
- Communication systems in the office and manufacturing area;
- Communications tools and communication services;
- Promotion of existing and innovative communication concepts both in developing countries and in developed countries;
- Teleservice architectures;
- Multimedia communications;
- New applications of communication systems, e.g. electronic commerce.

List of members under construction

**TC 7 (SYSTEM MODELLING AND OPTIMIZATION)** est. 1972

**AIMS**

- to provide an international clearing house for computational (as well as related theoretical) aspects of optimization problems in diverse areas and to share computing experience gained on specific applications;
- to promote the development of necessary high-level theory to meet the needs of complex optimization problems and establish appropriate cooperation with the International Mathematics Union and similar organisations;
- to foster interdisciplinary activity on optimization problems spanning the various areas such as Economics (including Business Administration and Management), Biomedicine, Meteorology, etc., in cooperation with associated international bodies.

**SCOPE**

Computational aspects of optimization problems arising in such areas as Aerospace, Biomedicine, Economics, Meteorology, and Public Services (Health, Environment, Police, Fire, Transportation, etc.).

Some specific examples are:

- on-line and off-line computational techniques in modelling and control of dynamic systems;
- trajectory analysis and computation;
- optimization of decentralized systems (macro-economic systems) and systems with multicriteria;
- optimization of resource allocation in urban systems;
- optimization of pollution-control systems;
- optimization of man-machine systems;
- optimization of power systems operation.

**TC 8 (INFORMATION SYSTEMS)** est. 1976, revised 1990

**AIMS**

To promote and encourage interactions among professionals from practice and research and advancement of investigation of concepts, methods, techniques, tools, and issues related to information systems in organisations.

**SCOPE**

The planning, analysis, design, construction, modification, implementation, utilization, evaluation, and management of information systems that use information technology to support and coordinate organisational activities including:

- effective utilization of information technologies in organisational context;
- interdependencies of information technologies and organisational structure, relationships and interaction;
- evaluation and management of information systems;
- analysis, design, construction, modification and implementation of computer-based information systems for organisations;
- management of knowledge, information, and data in organisations;
- information systems applications in organisations such as transaction processing, routine data processing, decision support, office support, computer-integrated manufacturing, expert support, executive support and support for strategic advantage plus the coordination and interaction of such applications;
- relevant research and practice from associated fields such as computer science, operations management, economics, organisation theory, cognitive science, knowledge engineering, and systems theory.

**TC 9 (RELATIONSHIP BETWEEN COMPUTERS AND SOCIETY)** est. 1976

**AIMS**

To influence the applications of computers with respect to individuals, groups, institutions and society. It is not concerned with computer developments which are strictly technical, or developments in which there is no scientific or technical component.

**SCOPE**

- Communicating Social Consequences:
  promote communication between computer-related professionals and others on relationships between computer technology and society.
- Promoting Social Accountability:
  help computer professionals to develop increasing awareness of the social consequences of their work, within IFIP and in the profession at large.
- Facilitating Research:

encourage studies on the effects of the uses of computers on individuals and society.

- Humanizing Information Systems:
  examine how the needs of individuals and society affect the design of technical systems involving computers.
- Enhancing the Quality of Life:
  identify and promote those uses of information processing which improve the quality of life of individuals and of society as a whole.
- Encouraging Responsible Long-Range Planning:
  promote forecasting studies to disseminate early warnings on human consequences of the use of computers, and encourage the development of long-range social plans to ensure that the use results in human benefits.

**TC 10 (COMPUTER SYSTEMS TECHNOLOGY)** est. 1976, revised 1987

**AIMS**

The Aims of the Committee are the promotion of the State-of-the-Art and the coordination of information exchange on concepts, methodologies, and tools in the stages in the life cycle of computer systems.

**SCOPE**

- system and component concepts, architecture and organisation;
- specification, design and verification methodologies of computer systems;
- logical design and fabrication of components and systems;
- evaluation of the parameters of computer systems and components;
- reliability;
- assessment of emerging technologies;
- application specific computer systems and components including peripherals.

**TC 12 (ARTIFICIAL INTELLIGENCE)** est. 1989, revised 1991

**AIMS**

Research in AI and promotion of interdisciplinary exchange between AI and other fields of information processing.

**SCOPE**

- Further develop the foundation for AI on the basis of computer science principles.
- Contribute techniques from AI to the enrichment of computer science and information processing.
- Develop AI techniques as part of information processing technologies to enable and advance practical applications.

**TC 13 (HUMAN-COMPUTER INTERACTION)** est. 1989

**AIMS**

To encourage development towards a science and a technology of human-computer interaction, the Technical Committee will pursue the following Aims:

- to encourage empirical research (using valid and reliable methodology, with studies of the methods themselves where necessary);
- to promote the use of knowledge and methods from the human sciences in both design and evaluation of computer systems;
- to promote better understanding of the relation between formal design methods and system usability and acceptability;
- to develop guidelines, models and methods by which designers may be able to provide better human-oriented computer systems;
- to co-operate with other groups, inside and outside IFIP, so as to promote user-orientation and "humani-zation" in system design.

**SCOPE**

The main orientation is toward the users, especially the non-computer-professional users, and how to improve the human-computer relationship for them.

Areas of study include:

- the problems people have with computers;
- the impact of computers upon people in both individual and organizational contexts;
- the determinants of utility, usability and acceptability;
- the appropriate allocation of tasks between computers and people;
- modelling the user as an aid to better system design;
- harmonising the computer to the characteristics and needs of the user.

While the Scope is thus set wide, with a tendency towards general principles rather than particular systems, it is recognised that progress will only be achieved through both general studies to advance theoretical understanding and specific studies on practical issues (e.g. interface design standards, software system consistency; documentation, appropriateness of alternative communication media, human factors guidelines for dialogue design, the problems of integrating multi-media systems to match user needs and organizational practices etc.).

**Name Index**

## A

AIKEN · 21
ARGENT · 47
ARLAT · 73
AS · 54
AUSIELLO · 27
AVGEROU · 66, 69
AVISON · 61

## B

BAEZA-YATES · 22
BAGCHI · 55
BAIRD · 23
BALKA · 66
BASTIDA · 13
BEARDON · 70
BEMMEL · 24
BENJAMINS · 80
BENYON · 82
BEQIRAJ · 13
BERDICHEVSKY · 13
BERLEUR · 66
BERNUS · 48
BERTOK · 44
BISHOP · 35
BOBILLIER · 12
BOLLERSLEV · 15
BOOYSEN · 76
BOTHA · 75
BOTTINO · 40
BOYANOV · 14
BOYNTON · 14
BRACHMAN · 24
BRAUNEIS · 2
BRIDGES · 23
BROSVEET · 24
BRUNNSTEIN · 16
BUBNICKI · 18
BUSBY · 83

## C

CARROLL · 82
CASACA · 49
CHARMONMAN · 20
CHOPPY · 30
CRAGG · 68
CUGINI · 44
CYRANEK · 70

## D

DAVIES · 42
DE CALUWE · 14
DECKER · 77
DEL MORAL · 20
DELGADO-KLOOS · 71
DENZER · 47
DIRKX · 71, 72
DOBSON · 76
DOLAN · 17
DOLEZAL · 15, 58
DOMOLKI · 16
DOSHITA · 79
DOUMEINGTS · 43
DUQUENOY · 67
DUTT · 74

## E

EBCIOGLU · 72
ELOFF · 76
ELORANTA · 46
ENCARNACAO · 47
ENRIGHT · 35

## F

FAIRALL · 75
FISCHER-HUEBNER · 70
FOCARDI · 32
FRANK · 42
FRISIANI · 17
FUNG · 42
FURUTA · 58

## G

GALINDO · 64
GAUDIOT · 72
GELENBE · 56
GIBBONS · 33
GIRAULT · 71
GLASGOW · 79
GLASSON · 60
GOLDSWORTHY · 12
GOLES · 31
GORDON · 64
GORRIERI · 27, 32
GOTTLIEB · 17
GRAFENDORFER · 14
GRAHAM · 36
GRANADO · 18
GREENSPAN · 37
GREGERSEN · 18
GROENLUND · 64
GUDZA · 22

## H

HAEBERER · 32
HAMMOND · 81
HARRIS · 69
HARTEL · 65
HAYDEN · 2
HEHNER · 34
HEWETT · 63, 82
HOFMEISTER · 38
HOGENBIRK · 39
HOLVAST · 67
HONEYMAN · 65
HORSPOOL · 35
HOUTEN · 44
HSIANG · 31
HUGHES · 37
HUMPHREYS · 62

## I

IAU · 25
IMAI · 74

IMPAGLIAZZO · 71
IYENGAR · 51

## J

JACUCCI · 44
JOHANSSON · 45
JOHNSON · 21, 23, 83

## K

KALL · 55
KANGASSALO · 60
KARAT · 81
KATSIKAS · 16
KAUTZ · 64
KAZMAN · 36
KENDALL · 61
KHAKHAR · 20
KING · 64
KINTALA · 29
KIRCHNER · 31
KOVAKS · 43
KRISTJANSDOTTIR · 22
KURKI-SUONIO · 15

## L

LABUSCHAGNE · 76
LAMBERT · 7, 86
LAPRIE · 16, 71
LASIECKA · 55, 56
LATOUCHE · 56
LEDUC · 50
LEE · 21, 66
LING · 68
LUNDBERG · 62

## M

MADON · 69
MAES · 58
MAGNENAT-THALMANN · 47
MALMBORG · 70
MAMBREY · 66
MARTI · 59
MARTIKAINEN · 53
MARTY-VRAYANCE · 70
